## **DETAILED ACTION**

### **Notice to Applicant**

1. This communication is in response to the Remarks filed on 10/23/06. Claims 1-3, 5-8, 10-11, and 22-31 are pending.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 5-8, 10-11 and 22-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ribitzky et al (6,363,393) in view of Evans et al (6,266,675) and further in view of Cooke et al (6,574,629), for substantially the same reasons given in the prior Office Action, and incorporated herein. Further reasons appear hereinbelow are presented.

### ***Response to Arguments***

4. Applicant's arguments filed on 10/23/06 with respect to claims 1-3, 5-8, 10-11, and 22-31 have been fully considered but they are not persuasive.  
(A) At pages 2-6 of the response filed on 10/23/06, Applicant argues the followings:  
(1) Ribitzky does not teach the uniform user interface such that the patient data of the functionality code segments and the first and second computer components are formatted with the same look and feel.

(2) Examiner is relying upon hindsight, having knowledge of the Applicants own structure.

(3) Neither Ribitzky, Evans nor Cooke and their combination teach or make obvious a functionality code segment and a user interface code segment, nor a uniform user interface to communicate patient data between the functionality code segments of the components and the uniform user interface such that the patient data of the functionality code segments of the PACS and RIS are formatted with the same look and feel.

(B) With respect to Applicant's first argument, Examiner respectfully submitted that He relied upon the teachings of Evans See Evans, Col.5, lines 11-51; Col.14, lines 1-67) which correspond to Applicant's claimed feature. Therefore, Applicant's argument is not persuasive and the previous Office Action is hereby sustained.

(C) In response, the Examiner respectfully submits that obviousness is determined on the basis of the evidence as a whole and the relative persuasiveness of the arguments. See *In re Oetiker*, 977 F.2d 1443, 1445, 24 USPQ2d 1443, 1444 (Fed. Cir. 1992); *In re Hedges*, 783 F.2d 1038, 1039, 228 USPQ 685,686 (Fed. Cir. 1992); *In re Piasecki*, 745 F.2d 1468, 1472, 223 USPQ 785,788 (Fed. Cir. 1984); and *In re Rinehart*, 531 F.2d 1048, 1052, 189 USPQ 143,147 (CCPA 1976). Using this standard, the Examiner respectfully submits that he has at least satisfied the burden of presenting a *prima facie* case of obviousness, since he has presented evidence of corresponding claim elements in the prior art and has expressly articulated the combinations and the

Art Unit: 3627

motivations for combinations that fairly suggest Applicant's claimed invention (see paper number 28). Moreover, in the instant case, the Examiner respectfully notes that each and every motivation to combine the applied references are accompanied by select portions of the respective reference(s) which specifically support that particular motivation and/or an explanation based on the logic and scientific reasoning of one ordinarily skilled in the art at the time of the invention that support a holding of obviousness. As such, it is NOT seen that the Examiner's combination of references is unsupported by the applied prior art of record. Rather, it is respectfully submitted that explanation based on the logic and scientific reasoning of one ordinarily skilled in the art at the time of the invention that support a holding of obviousness has been adequately provided by the motivations and reasons indicated by the Examiner, *Ex parte Levengood*, 28 USPQ2d 1300 (Bd. Pat. App. & Inter., 4/22/93).

In addition, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the Applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

(D) With respect to Applicant's third argument, Examiner respectfully submitted that He relied upon the teachings of Cooke See Col.22, lines 1-63; Col.34, lines 21-67 to

Art Unit: 3627

Col.35, line 67) which correspond to Applicant's claimed feature. Therefore, Applicant's argument is not persuasive and the previous Office Action is hereby sustained.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
